Functionality  
never looked  
this good

We're a company with a commitment to innovate the ordinary. We take the equipment you use every day, and we find a way to improve it. Sometimes you don't realise there's a better way of doing things until someone shows you. That's the magic of innovation.

At Nimble, our aim is never to just solve the problems you already know about. We want to solve the ones you didn't even know existed. We keep design at the centre of the process to make sure everything we invent looks good too. Because why can't functional be beautiful ■

# Nimble

## the nimble story

**Nimble is new, but  
with over 40 years  
healthcare industry  
experience, the team  
behind it isn't.**

We've been building relationships, listening, studying and carefully observing the market. We've found that many essential product categories have been void of innovation, which is where Nimble comes in.

Nimble has been established to innovate the ordinary, essential products that are ripe for improvement.

Basically, we find products with flaws, design challenges and quality issues, and we transform them into products that are elegant, strong, and functionally superior.

The way we see it, by making this promise to innovate the ordinary, we can take one product at a time, and we can create products that don't just perform better, but also bring a smile to the face of the person using it.

At the core of everything we do is the question 'how can we make things better?' and we believe that once you see what Nimble's all about, you won't look back ■

# Nimble

**Our ethos drives us and sets us apart from competitors.**

**1. Beautiful products for the medical industry with elegant design & superior functionality:**

Our products look good, function better and make the day of the end user just that little bit brighter each time they use them.

**2. Driven by purpose – to innovate the ordinary:**

We strive to make the world a better place with a commitment to innovate the ordinary. We innovate by improving design, functionality and experience.

**3. A consulting approach:**

Consulting 1st, product 2nd is our approach – solving problems anywhere we can.

**4. A better experience:**

We are receptive and responsive to the needs of our customers. Shorter lead times are catered for. Easier transaction processes are sorted. We focus on relationships for the long term.

**5. A better hospital experience:**

Products deliver a better hospital experience to practitioners and clinicians everywhere, all around the world.

# the nimble ethos

An aerial night photograph of a city, likely New York City, showing a dense grid of streets and buildings illuminated by city lights. A large body of water, possibly a river or harbor, is visible in the center, reflecting some of the lights. The word "Nimble" is written in a bold, blue, sans-serif font in the top left corner.

**Nimble**

**/ Creativity is  
thinking up  
new things.  
Innovation  
is doing new  
things.”**

Theodore Levitt

A smaller, partial view of the same aerial night city photograph, showing the grid streets and lights, located at the bottom left of the slide.

# Nimble

Nimble presents our revolutionary storage system. Featuring a host of innovative elements, the Nimble Storage System uniquely combines design, flexibility and functionality for a better healthcare experience.

# Nimble Storage System

**It's all about flexibility, where you are in control of the size and set up that works best for you.**

The Nimble Storage System has been designed to combine high density storage with strong and durable shelving. With the need for more efficient supply methods within healthcare facilities, space is limited and therefore more innovative solutions are required. Our unique system allows you to optimise your supply chain within your facility by providing a highly customisable storage solution.

We have essentially taken the best of both worlds, from wire shelving and the modular basket storage, and combined them. The modular design of the Nimble System allows for easy and flexible integration with unlimited options to suit your needs.

**Strength:**

Using the collar sleeve mechanism to deliver high weight capacities.

**Flexibility:**

Ability to create a fit for purpose solution in any environment.

**Functionality:**

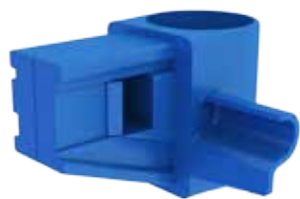

Maximise your storage capacity with easy to customise solutions.

At Nimble, we are driven by our purpose to innovate the ordinary. We have developed and patented a number of new innovations that ensures the Nimble Storage System will provide a uniquely better experience and outcome for healthcare practitioners and facilities.

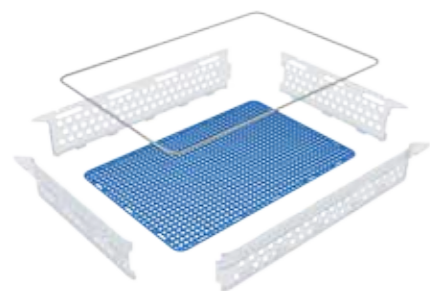

## Split Collar Innovation

Adding more shelves to a unit and changing the configurations is easier than ever. The split collar further improves on current high density shelving systems in the market by allowing you to connect one shelf directly onto another shelf. Additional posts or 'S' hooks are no longer needed for your shelving system.

## Knuckle & Rail System

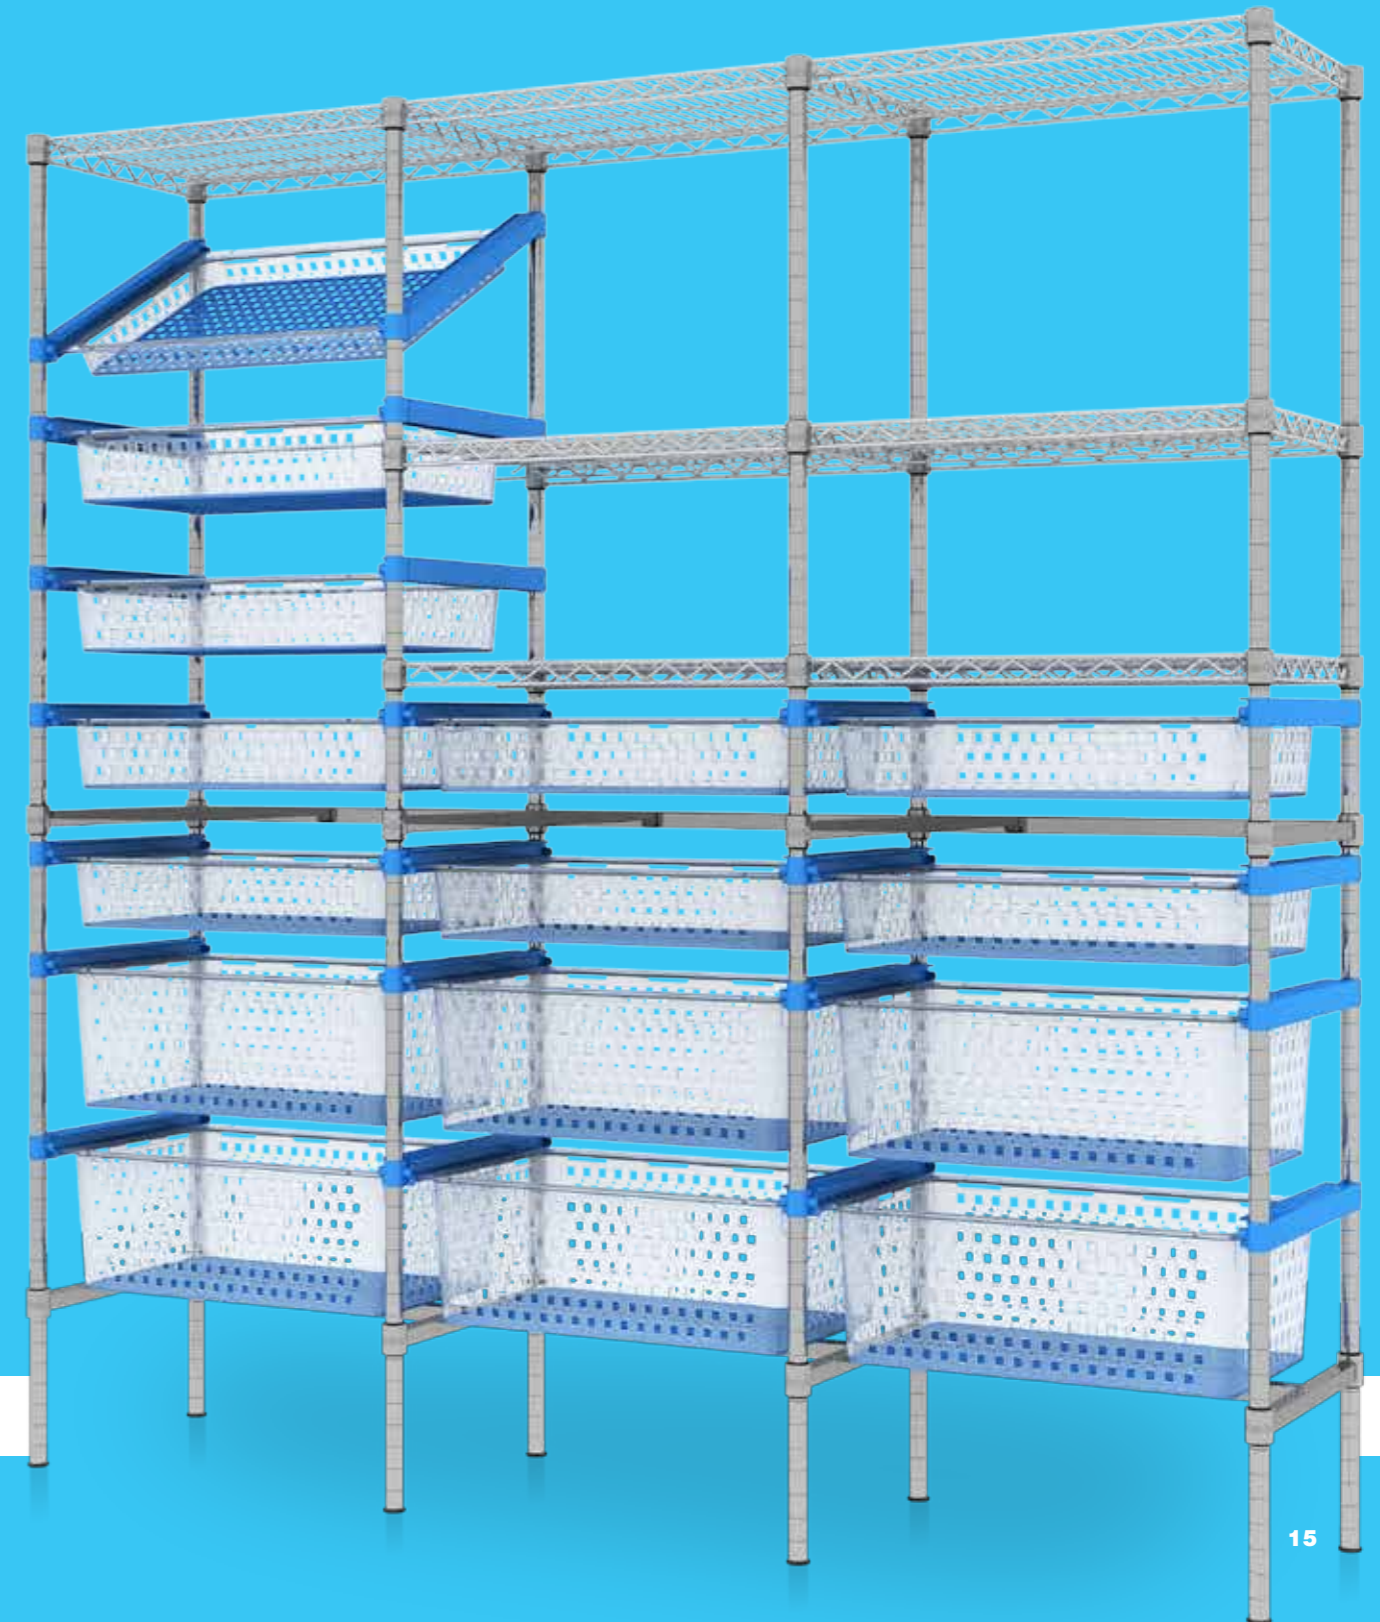

The design took inspiration from the split collar's easy to build design concept. The clever wrap around design tightly grips the post and allows clinicians to add or remove trays without breaking down the unit. This gives clinicians the opportunity to move and configure trays in a way that best works for their storage needs.

## Flat Pack Trays

Introducing our Nimble flat pack trays that seamlessly integrate with the Nimble Storage System without compromising the strength or weight capacity of the trays. The plastic tray can be easily broken down for cleaning, and transported and stored conveniently with added features that make Nimble a cut above the rest. The fine mesh base gives clinicians the opportunity to store even the smallest of items in the trays.

Design the configuration that meets your needs, with the flexibility to easily make changes when you require.

The Nimble Storage System is the flexible solution to high density storage offering clinicians the opportunity to adapt the wire shelving and trays to suit their needs.

Single Bay

Double Bay

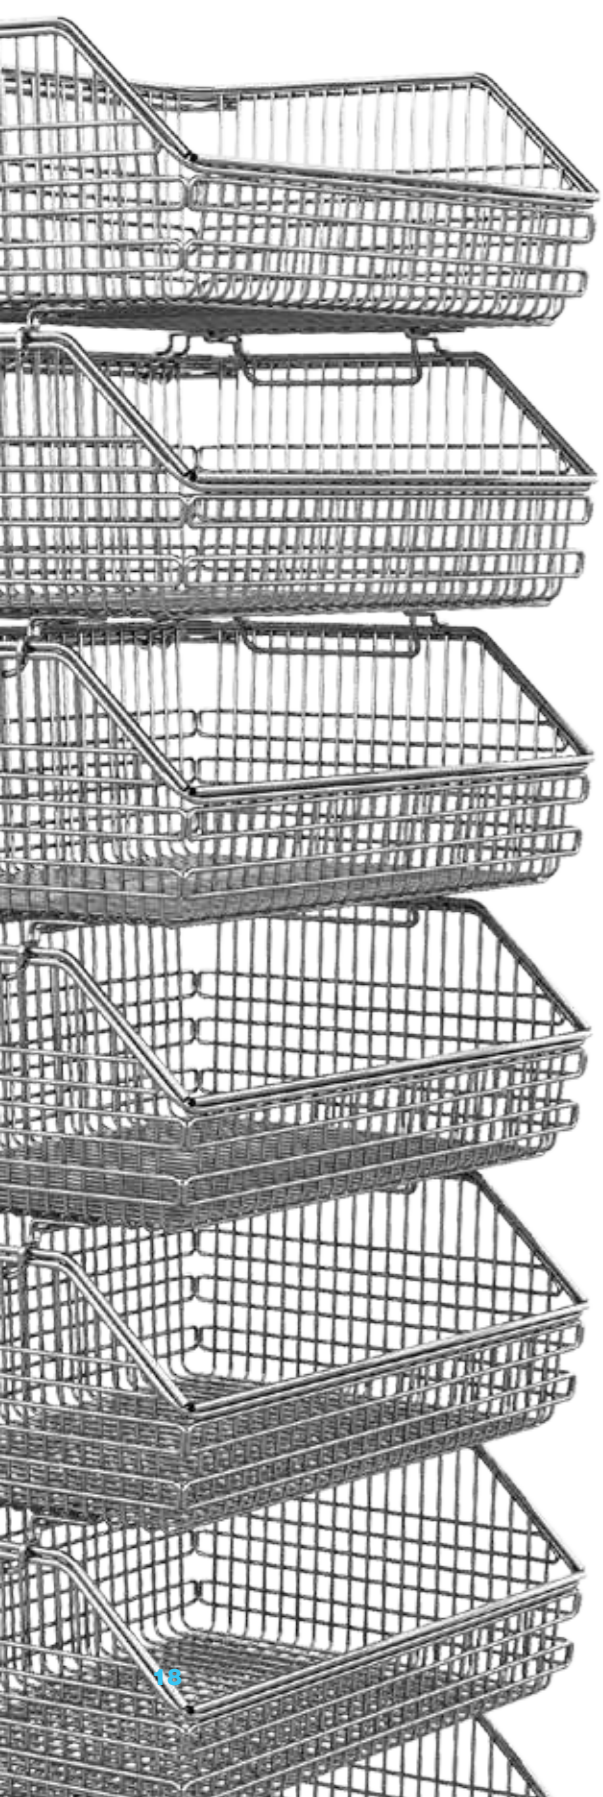

Triple Bay

High Density Compactor

The options are endless...

Not all wire baskets are made equal... Nimble has brought its design influence to the simple wire basket. Designed using fine mesh to ensure even small items can be stored, the Nimble wire baskets also include reinforced bars for extra strength, a clever divider system and a unique stacker that maximises space.

**Dividers**

No more bent or difficult to remove dividers. The Nimble dividers have been designed to be easily removed and added to baskets with a simple and clever lever system which locks them securely in place.

**Stacker**

Nimble's stackable basket option eliminates wasted space by storing baskets on top of each other, either on a desk, workstation, or shelving. It improves the efficiency of storage and makes the most of limited space.

**Wall Panels**

Panels have been designed to allow each unit to sit flush against each other so you can connect as many panels together as you like and it will be a direct continuation of wall storage.

Nimble

/ Innovation is  
seeing what  
everybody  
has seen and  
thinking what  
nobody has  
thought.”

Dr Albert Szent-Györgyi

# Nimble

Nimble presents our Blue Shoes Stainless Steel Collection. A curated group of products essential to the operation of healthcare facilities, but designed to look good, function better and make the day of the end user just that little bit brighter each time they use them.

# Blue Shoes Stainless Steel Collection

## At Nimble we have focused on the little design areas that can make a big difference.

We listened when people said mobility is key. So we made an effort to find a castor that provides extra strength and smooth mobility – the fact that it looks great is that added Nimble touch.

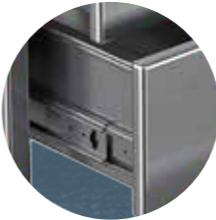

We recognised that we can bring some of the functionality from the products we use at home back into the workplace; hence the soft close drawers on all our trolleys and smooth double folded edges.

We also know that the environment in which this equipment is used needs to be clean and often sterile; hence the addition of full-welded seams to ensure there are not any gaps for dust and bacteria to be trapped.

The Nimble Blue Shoes Stainless Steel collection is one that will deliver a better experience to healthcare professionals all around the world.

Stand out from the crowd

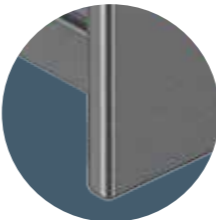

Drawer Runners

Soft-closing drawer runners. Full extension and easy glide system.

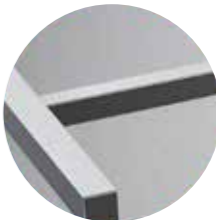

Full Welded Caps

Full weld seams and caps ensure a smooth finish with no gaps which reduces entrapment of bacteria.

Folded Edges

Present on all drawers, shelves and edges of the trolley – the smooth fold allows for safe handling.

Solid Underbracing

Full length underbracing on the underside of the trolley provides maximum stability and strength.

Nimble Blue Shoes

Smooth gliding rubber wheels. Providing maximum mobility and a better user experience.

Stainless Steel Construction

304 grade stainless steel provides a smooth satin finish.

# Nimble

Nimble presents our modular, height adjustable CSSD table. Designed to enable clinicians to configure to their requirements, the Nimble CSSD table provides a unique flexible option.

# Modular CSSD Tables

## Customise to suit your needs...

Our height adjustable tables have been designed to maximise flexibility, functionality and ergonomics for the CSSD professional. The table height is able to be adjusted to the type of task that needs to be performed and to the individual's personal preferences.

The flexible modular system allows for the easy addition of accessories, while the robust stainless steel construction and smooth table surface with hidden connection points creates an ideal work surface that is easy to clean.

### Pull out keyboard shelf

Free up space to keep the work surface clear.

### Cantilever wire shelf

Creates additional upper storage and shelving space.

### Lower wire shelf

Creates extra storage space beneath the work surface.

### Sterile wrap rack

Available with telescopic arms to suit any size wrap.

### Pull out drawers

Creates extra storage space beneath the work surface.

### Wire baskets and storage

Various sized baskets available for optimised storage space.

The Nimble Modular CSSD Tables are available in various sizes to suit a range of applications.
